

# PURCHASING POLICY

*The Management of Aqua Mirage Club Marrakech, aware to carry out its activities by following instructions to buy goods and services acting with respect for environment, is determined to comply efficiently the following principles of purchasing:*

**General principle:** *Respect of the best quality/price for the selection of offers, taking into consideration the economic, social and environmental dimensions related to the entire product life cycle and organization of suppliers. This guideline includes a reference to the purchase of goods and services locally produced.*

**Purchases:** *Prioritize the purchase of local products to strengthen the economic and social development of the community, if they guarantee the standards of quality, price and the health and safety criteria. Give satisfaction to your guests by offering local products in our restaurants, fresh and reflecting our cuisine and culture.*

**Valuation of supplier commitments:** *encourage suppliers who are committed to the respect of decent working conditions, to reduce environmental impact during the manufacture or performance of the service and transparency on costs related to the life cycle of products.*

**Transparency of the production chain:** *promote all suppliers with a good knowledge of the production chain (traceability).*

**Commitment to suppliers:** *provide clear information to facilitate drafting of offers from suppliers. If possible, engage in duration with suppliers and seek mutual benefit.*

**Training and awareness:** *organize regular training on sustainable procurement for purchasers and all other persons involved in the procurement (department managers, accounting agent, users of products and equipment).*
